

**Project Design Phase
Proposed Solution Template**

Date	6 July 2026
Team ID	
Project Name	Cosmetics Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

Proposed Solution Template:		
Project team shall fill the following information in the proposed solution template.		
S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	The cosmetics industry generates vast amounts of data related to products, brands, ingredients, reviews, pricing, and consumer preferences across multiple platforms. Extracting meaningful insights from this scattered data is challenging. There is a need for an interactive platform that transforms raw cosmetics data into clear visual insights to help consumers, researchers, and businesses make informed decisions.
2	Idea / Solution Description	Cosmetic Insights is a web application built using Tableau and Flask that provides interactive dashboards, KPI cards, charts, and stories to analyze cosmetics trends and consumer insights. The platform enables users to explore top products, brands, categories, ingredient performance, ratings, price analysis, and consumer preferences through an intuitive and user-friendly interface.
3	Novelty / Uniqueness	Cosmetic Insights combines Tableau's powerful visualization with a Flask-based web application to deliver a seamless and interactive analytics experience. It offers a centralized platform for exploring cosmetics data with dynamic filters, trend analysis, and story-driven insights in a simple and easy-to-understand format, making data exploration accessible to everyone.
4	Social Impact / Customer Satisfaction	Cosmetic Insights empowers consumers to make better product choices, helps researchers and students understand cosmetics trends, and supports businesses in identifying market opportunities. The platform promotes informed decisions, enhances product transparency, and contributes to consumer satisfaction and trust in the cosmetics industry.
5	Business Model (Revenue Model)	Cosmetic Insights can be offered as a subscription-based analytics platform for cosmetic brands, retailers, and research organizations. Additional revenue can be generated through premium dashboard access, customized reports, brand analytics services, advertising slots, data partnerships, and institutional licensing.
6	Scalability of the Solution	Cosmetic Insights is designed with a modular architecture that supports integration of new data sources, advanced dashboards, predictive analytics, cloud deployment, user authentication, role-based access, and real-time data updates. This ensures the platform can scale efficiently to handle growing data, more users, and expanded features in the future.
